1.2 Coverage and Participation. The intended coverage of this RFP and any Agreement resulting from this solicitation shall be for the use of all Departments at the University of Arizona. The other State Universities, Arizona State University (ASU) and Northern Arizona University (NAU), along with Pima Community College (PCC) and any other educational institution or Governmental entity may access an Agreement resulting from this solicitation issued and administered by the University of Arizona.

2.10 Request for Proposals (RFP). A competitive process under which discussions and negotiations are allowed, it is not to be confused with a Request for Bid (RFB), in which goods or services are precisely specified and price is substantially the only competitive factor. 2.11 Respondent. Same as Vendor.

2.12 Response. Same as Proposal.

2.13 Responsible Vendor. A person who has the capability, including necessary experience, to perform the contract requirements; who has the integrity and reliability which will ensure good faith performance and appropriate quality of the materials, services, construction or construction services, to be provided; and who is in compliance with any and all licensing requirements of the State of Arizona.

2.14 Responsive Vendor. A person who submits a proposal which conforms in all material respects to the Request for Proposals.

### 3.7.5 Addenda and the University’s Response to Communications from Vendor.

The University will make a good-faith effort to provide a written response to each question or request for clarification that requires addenda within five (5) University business days.

*All addenda will be posted to our web site only:*

http://pacs.arizona.edu/RFP-BID_Opportunities

- Vendors who want the addenda supplied to them in another form must notify Tom Fiebiger C.P.M. of that requirement. Otherwise, it will be the vendor’s responsibility to check the web site for any additional information and addenda concerning this RFP.
3.7.6 **Pricing and/or Revenue Proposal.** Vendors shall indicate pricing and/or revenue offers in the appropriate spaces and/or areas provided in this RFP. The University may presume and hold as the vendor's final offer all pricing and/or revenue offerings, whether stated as amounts or percentages, and/or whether or not offered on an all-or-none basis, if not specified by the vendor. The University may accept or reject in part or entirely the vendor's pricing and/or revenue offerings when such offerings are not on an all-or-none basis. Vendor's pricing and/or revenue proposals may not be modified after the RFP Due date and time unless University at its sole discretion decides that future negotiations will only enhance the Vendor's offer to University. Should University decide that such negotiations would not be in University's best interests, pricing and revenue offer by Vendor at Due date and time may be considered by University as the Vendor's best and final offer. Unless otherwise specifically proposed by the vendor, the University reserves the right to hold such pricing and/or revenue proposal as effective for the entire intended contract term. The University may prescribe the manner and method by which pricing and/or revenue offerings shall be communicated in the vendor's proposal. The University may reject any proposal in which the pricing and/or revenue offering does not conform to such prescribed manner and method. Vendors shall indicate pricing and/or revenue offers in the appropriate spaces and/or areas provided in this RFP. Vendors shall ensure that any departure from this condition results in an offer that is clearly cross-referenced to the applicable sections within this RFP. For any material departure from this condition, vendors shall provide clear and unambiguous explanations how the departure relates in detail to the applicable sections within this RFP. If the vendor responds with an "All-or-None" proposal, it shall be clearly and unambiguously marked as such.

3.7.7 **Revisions to the RFP.** The University may revise any part of this RFP for any reason by issuing addenda. The University will communicate additional information and addenda to this RFP by posting them on our web site.

http://pacs.arizona.edu/RFP-BID_Opportunities

- Vendors that want the revisions supplied to them in another way must notify the Buyer listed in this document of that request. Otherwise, it will be the vendor's responsibility to check the web site for any additional information and addenda concerning this RFP.

Vendors are responsible for the information contained in such addenda, whether or not they acknowledge receipt. The University is under no obligation to communicate such addenda to vendors who notify the University that they will not be responding to this RFP. The University may determine whether an addendum will be considered as part of this RFP and/or as part of any resultant contract. The University shall reject vendors' responses to addenda if such responses are received after the RFP Due date and time.

3.7.8 **Attention to Terms and Conditions.** Vendors are cautioned to thoroughly understand and comply with all matters covered under the Terms and Conditions
section of this RFP. The successful Vendor is expected to enter into a form of agreement approved by the Arizona Board of Regents. - Any additional responses in corresponding sequence order

3.7.11 **Collusion Prohibited.** In connection with this RFP, vendor collusion with other vendors or employees thereof, or with any employee of the University, is prohibited and may result in vendor disqualification and/or cancellation of award. Any attempt by the vendor, whether successful or not, to subvert or skirt the principles of open and fair competition may result in vendor disqualification and/or cancellation of award. Such disqualification and/or cancellation shall be at no fault or liability whatsoever to the University.

3.7.12 **Improper Business Relationships / Conflict of Interest Prohibited.** In connection with this RFP, each vendor shall ensure that no improper, unethical, or illegal relationships or conflict of interest exists between or among the vendor, the University, and any other party to this RFP. The University reserves the right to determine the materiality of such relationships, when discovered or disclosed, whether intended or not; and to decide whether or not vendor disqualification and/or cancellation of award shall result. Such disqualification and/or cancellation shall be at no fault or liability whatsoever to the University.

3.7.13 **Corrections, Changes, and Providing Information on Forms within the RFP.** Vendors shall ensure that an authorized individual initials each correction using pen and ink. The University is not liable in any manner or to any extent for any cost or expense incurred by any vendor in the preparation, submission, presentation, or any other action connected with proposing or otherwise responding to this RFP. The University will, in good faith and to the extent allowed by law, honor any vendor information that is clearly designated and conspicuously labeled as proprietary, and the University agrees that the information is proprietary. If the vendor needs to submit proprietary information with the proposal, the vendor shall ensure that it is enclosed in a separate envelope from the proposal and that it is clearly designated and conspicuously labeled as such. The envelope must also contain the reason(s) why the enclosed material is to be considered proprietary. At no time shall the entire proposal be considered proprietary and be kept confidential. The University shall not be liable in any manner or in any amount for disclosing proprietary information if such information is not clearly so designated and conspicuously so labeled. The University shall likewise not be liable if it did not
know or could not have reasonably known that such information was proprietary.  

Pricing information cannot be considered proprietary or confidential.

3.9.15 Certification. By signature on the “Proposal Certification” form included herein, the Vendor certifies that the submission of the proposal did not involve collusion or other anti-competitive practices. The Vendor has not given, offered to give, nor intends to give at any time hereafter any economic opportunity, future employment, gift, loan, gratuity, special discount, trip, favor, or service to a public servant in connection with the submitted proposal. In addition, Vendor certifies whether or not an employee of the University has, or whose relative has, a substantial interest in any Agreement subsequent to this RFP. Vendor also certifies their status with regard to debarment, or suspension by any federal entity.

Signing the certification with a false statement shall void the proposal and, if applicable, any resulting Agreement. Any resulting Agreement may be subject to legal remedies provided by law. Vendor agrees to promote and offer to the University only those services and/or materials as stated in and allowed for under resulting Agreement(s).

  o Describe any e-book publisher agreements that you have secured.
  o What is your overall strategy for ongoing addition of content to your index? (e.g., open-access content, ebooks et al.).
  o Describe how content is added to or excluded from the central/base index.
o Provide information as to the percentage of coverage provided for the UA Libraries’ licensed content.
o Please provide a breakdown of which UA Libraries holdings are NOT included in your central/base index.
o What options are available for accessing content that isn’t available in the central index?
o Are holdings from other libraries included in the central/base index? If so, how? Are WorldCat records included in the central/base index?
o Which open-access resources are included in the central/base index? For example, does it incorporate results from the Western Regional Storage Trust, HathiTrust, ArchiveGrid, and Western Waters?
o Can we make suggestions for reputable content to add to the central/base index?
o How can local content (e.g., repository, digital collections) be included in your index?
o Are the open access digital collection records and institutional repository records from your other customers included in the central/base index? If our local content is harvested into the central index, is it automatically open to all other customers, or could we choose not to expose it?
o Where does “content type” information come from? Is there an ability to assign multiple content types to metadata records (for example, books that are also government documents)?
o Can your discovery tool include RDA (Resource Description and Access) formatted records?
o Can data sets be included in the central/base index?
o Describe how de-duplication is supported, and if there is FRBR support. What is de-duped? (e.g., with Romeo & Juliet book editions, movies, CDs, and music scores – how would those display?)
o If a full-text PDF of a certain journal article is available in multiple database subscriptions, can your system de-dupe results for the user? (i.e., so that results show one main link to the article rather than multiple options – if that link doesn’t work, can the patron be directed to the next best option?)

  o Please describe how your system would integrate content from the UA Libraries’ DSpace, UAiR, CONTENTdm, and Open Journal Systems platforms, as well as content from our Center for Creative Photography’s The Museum System, into the central/base index.
  o Describe how the system harvests content from local and remotely hosted repositories via the Open Archives Initiative Protocol for Metadata Harvesting (OAI-PMH).

- Updates to Content
  o How frequently is the index updated?
How are libraries alerted to new content being added, removed, or changed in the index?

Describe the methods and ongoing effort needed by the UA Libraries to incorporate our local content into the central/base index.

5.0.3.3 Systems and Interoperability

- **Library Systems**
  - Please describe how your product:
    - Interoperates with our current ILS, Millennium.
    - Interoperates with ILLiad, including prepopulation of ILL forms.
    - Interoperates with Relais D2D.
      - Relais D2D requires use of an OpenURL. Please describe how you utilize OpenURLs.
    - Is compatible with our link resolver (360 Link).
    - Works with EZproxy.
  - Will the system invoke our OpenURL resolver in order to locate materials?

- **Campus Systems**
  - Please describe how your product interacts with course management systems (CMS) such as D2L, Blackboard, and Moodle.
    - Can materials be easily exported into the CMS? How does this work?

- **Authentication**
  - Please describe how the system handles authentication.
  - Does your system enable single sign-on via CAS and/or Shibboleth, even in cases where databases ordinarily require additional log-ins?
  - Can access to particular resources be restricted by type of user (for example, UA users get access to all, visitors a smaller subset)?
    - Is it possible to further restrict access to specific subsets of UA users? For example, only Law faculty and students can access the Law Library’s Lexis/Westlaw database and must sign in to it with a separate password. The Law and Health Sciences Libraries currently use IP addresses and a proxy server to regulate access to certain content. How would your discovery system handle this?
  - Please describe how the discovery tool handles situations in which the Libraries have a limit to the number of simultaneous users with a particular content provider, database, or collection.
  - Can off-campus visitors search in the discovery tool without authenticating? Do the results display differently depending on the level of authentication?
  - Can the Libraries control the point at which authentication is required?

- **Ingestion of Records**
  - Identify all metadata schemas that your tool supports.
  - Is the system metadata agnostic?
  - Describe any conversion tools or utilities that will translate from one metadata
schema to another.
  o Describe how the product accommodates multiple content standards and encoding schemas including, but not limited to, Encoded Archival Description, Metadata Object Description Schema, and Dublin Core.

- Customer Privacy
  o How does your system handle or collect personal information gathered during search sessions, or when creating user accounts within the system?

- Testing Environment
  o If your system provides a development/test environment, please describe it.

5.0.3.4 Customization

- Search Customization
  o Please describe how your product enables the Libraries to customize search boxes, advanced searches, and search facets.
  o Can subject-scoped search boxes be created?

- Display Customization
  o Please describe how your product enables customization of:
    ▪ The display of results.
    ▪ The interface’s look and feel (e.g., branding, fonts, colors, banner, hyperlinks, etc.).
    ▪ Subject heading types.
    ▪ Appearance and order of facet clusters.
  o Does your product enable the Libraries to:
    ▪ Rename the service?
    ▪ Create customized icons for items in search results?
    ▪ Define new facet clusters?
    ▪ Change facet labels?
    ▪ Remove facets?
    ▪ Develop custom “widgets”?
    ▪ Control widget placement?
    ▪ Embed the search box in other applications and locations?
    ▪ Create separate and unique profiles/interfaces/branding for different UA library units (e.g., Special Collections, Law Library, Health Sciences Library, Center for Creative Photography)?
    ▪ Integrate library website information into search results or via API?
    ▪ Suppress certain metadata fields within the results display?
    ▪ Incorporate links to external enriched content (e.g., Google Book Previews; Amazon.com item information, Syndetics)? How does your system accommodate outages in linked content?
    ▪ Embed multimedia?

- API
  o Please describe the API as fully as possible, including its stability and frequency of changes.
How do you communicate changes about your API?

Does your interface use the same API that you would give us access to (i.e., do you eat your own dog food)?

Are there any restrictions around using your API?

Relevancy

Describe how relevancy can be customized, if it can.

We want to ensure that our local content (e.g., ILS bibliographic records, digital collections) will remain visible and discoverable within the larger pool of content indexed by your discovery service. Can we alter the relevancy of local collections or particular items?

5.0.3.5 Support

Implementation/Maintenance

Please describe the basic steps that a client library would go through to fully implement your product.

Please describe the level of support you provide during the implementation process. Does it include on-site personnel?

What would be needed in terms of library staff resources during the implementation process?

Describe your experience migrating records and data from Innovative Interfaces’ Millennium. Describe any specific considerations or difficulties in migrating records and data from Millennium into your product.

Describe the ability during migration to merge similar bibliographic records without loss of locally created data.

Can you meet our go-live goal of having the discovery system implemented by the start of Fall 2013 classes (Aug. 26, 2013)?

Can you supply additional support as needed (e.g., for programming, training)? Would this be an additional cost?

For all reporting, updating, importing, and exporting functions, please describe the level of staff expertise needed to perform the operation. In particular, identify which functions require the intervention of Systems/IT personnel as opposed to functions that library staff can perform on their own.

Describe what kind of scheduled down time the solution requires, noting the frequency, duration and purpose.

Describe any initial configuration or implementation decisions that cannot be later changed, or altered only with great effort or expense.

Describe your customer support venues (e.g., web, phone, email), periods of coverage, and expected and actual response times.

Describe the frequency and scope of both major and minor releases. How long do you support a major platform release after it has been superseded by a new version?

User Community

Please describe your user community group and the resources available from it
(e.g., sharing of widgets or API code).

- Training
  - What instruction/documentation do you provide on how to use/customize the discovery system?

    - Can Google Analytics be incorporated into the product?
    - Can we access statistics via the API?
    - In which format(s) can reports be downloaded (e.g., Excel, PDF, Word, CSV)?
    - Can reports be customized?
    - Are statistics COUNTER 4 compliant?
  - Please describe your mechanisms for users to provide feedback to the library on the discovery interface.
  - Please provide your development road map for the next 18-24 months
