

Addendum #1 to RFP S061016

Please note answers to a couple of questions submitted prior to the cut-off for questions 10/19/09.

1. In 4.0 Agreement Terms and Conditions, it states in 4.23 Furnish and Install; the items specified in this solicitation will be provided on a furnished and installed basis.

In Additional Requirements and Specifications 5.24 it states; Manufacturer shall supply installation instructions as part of the proposal response.

Are we to provide installation labor as part of our response to install the transmitter equipment?

Answer: **No.**

2. In Additional Requirements and Specifications 5.34 it states; the University is not responsible for costs of required items that are not noted in the rfp submittal document.

This is a open end statement. Not knowing what KUAZ-AM needs other than what was spec'd out in the RFP document.

For instances do you need a HD/FM processing equipment, HD mod. monitoring equipment, etc.... Or are you stating items required to get the transmitter up and running?

Could you please clarify and or specify equipment that will be required for KUAZ-FM?

Answer: **Just items required to get the transmitter up and running.**
